

PUBLIC NOTICE

Eastman Chemical Company has applied to the Tennessee Air Pollution Control Division (TAPCD) for a significant modification to their major source operating permit numbers [557901](#) and [547972](#) subject to the provisions of paragraph 1200-3-9-.02(11) of the Tennessee Air Pollution Control Regulations (also frequently referred to as Title V regulations). A major source (Title V) operating permit is required by both the Federal Clean Air Act and the Tennessee Air Pollution Control Regulations.

The applicant is **Eastman Chemical Company** with a site address of South Eastman Road, Kingsport, Tennessee. They seek to obtain significant modifications to their major source operating permits for their chemical manufacturing operation.

FIRST ITEM:

The significant modification involves the implementation of alternative monitoring for equipment in acetic acid or acetic anhydride service, as approved by U. S. EPA. The alternative monitoring will be used to demonstrate compliance with the Leak Detection and Repair provisions of 40 CFR 60 Subpart VV (Standards of Performance for Equipment Leaks of VOC in the Synthetic Organic Chemicals Manufacturing Industry).

The existing Title V operating permit subject to the modification is identified as follows: Division identification number **82-0003/557901** – MSOP-01. The process emission source affected by the modification is identified as follows: PES-B-99-8/Division emission source reference identification number 82-1009-64. This significant modification is conducted pursuant to subpart 1200-3-9-.02(11)(f)5(iv) of the Tennessee Air Pollution Control Regulations. Only the portion of the Title V permit affected by the significant modification is open to comment during the notice period.

SECOND ITEM:

The significant modification involves the removal of a storage tank from service in one permitted emission source, and the addition of this tank to a different source, the removal of a parametric monitoring requirement from one permitted emission source, and the addition of three storage tanks to the list of vessels subject to 40 CFR 63 Subpart G (National Emission Standards for Organic Hazardous Air Pollutants from the Synthetic Organic Chemical Manufacturing Industry for Process Vents, Storage Vessels, Transfer Operations, and Wastewater). This significant modification would allow small increases in fugitive VOC emissions from some sources, although total VOC emissions would decrease.

The existing Title V operating permit subject to the modification is identified as follows: Division identification number 82-0003/547972 – MSOP-21. The process emission sources affected by the modification are identified as follows: PES-244D-2/Division emission source reference identification number 82-1006-03; and PES B-244E-1/ Division emission source reference identification number 82-0003-23. This significant modification is conducted pursuant to subpart 1200-3-9-.02(11)(f)5(iv) of the Tennessee Air Pollution Control Regulations. Only the portions of the Title V permit affected by the significant modification are open to comment during the notice period.

A copy of the application materials used by the TAPCD and a copy of the draft permit are available for public inspection during normal business hours at the following locations:

Kingsport Public Library & Archives
400 Broad Street
Kingsport, TN 37660-4292

and

Tennessee Department of Environment and Conservation
Division of Air Pollution Control
9th Floor, L & C Annex
401 Church Street
Nashville, TN 37243-1531

Also, if you require a copy of the draft permit it is available electronically by accessing the TDEC internet site located at:
<http://www.state.tn.us/environment/apc/apcppo>

Interested parties are invited to review these materials and comment. In addition, a public hearing may be requested at which written or oral presentations may be made. To be considered, written comments or requests for a public hearing must be made within thirty (30) days of the date of this notice and should be addressed to **Mr. Barry R Stephens, P.E., Director, Air Pollution Control Division, 9th Floor, L &**

C Annex, 401 Church Street, Nashville, Tennessee 37243-1531. Questions concerning the source(s) may be addressed to Mr. Travis Blake at the same address or by calling (615) 532-0554 or (615) 532-0617. A final determination will be made after weighing all relevant comments.

Individuals with disabilities who wish to review information maintained at the above-mentioned depositories should contact the Tennessee Department of Environment and Conservation to discuss any auxiliary aids or services needed to facilitate such review. Such contact may be in person, by writing, telephone, or other means, and should be made no less than ten days prior to the end of the public comment period to allow time to provide such aid or services. Contact the Tennessee Department of Environment and Conservation ADA Coordinator, 12th Floor, 401 Church Street, Nashville, TN 37243, 1-(866)-253-5827. Hearing impaired callers may use the Tennessee Relay Service, 1-(800)-848-0298.
